# PARTHIBAN M

**Full-Stack Software Engineer**

+91 8754131978 | parthibanm1268@gmail.com | LinkedIn | GitHub | Portfolio

## PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 1.10+ years building production SaaS and B2C platforms with React, TypeScript,Node.js, NestJS and PostgreSQL. Strongest in multi-tenant financial backends, accounting and reporting engines, secure authentication, and AI/MCP integrations, across Financial Multi-Tenant SaaS Platform and TheBusStand.com.

## TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Java, SQL
- **Frontend:** React.js, Redux, React Router, Tailwind CSS, Ant Design, Bootstrap
- **Backend:** Node.js, NestJS, Express.js, REST API Design, JWT (RS256/JWKS), OAuth 2.1/PKCE, MCP, RBAC, Handlebars, Puppeteer, PDFKit
- **Database:** PostgreSQL (advisory locks, CTEs, migrations), MySQL, MongoDB, Sequelize
- **Architecture:** Multi-Tenant SaaS (schema-per-tenant, database-per-tenant), Modular Monolith, Event-Driven Design, SOLID Principles
- **DevOps & Testing:** Docker, Nginx, GitHub Actions, AWS EC2, Cloudflare, Jest, Postman, Swagger, Husky, n8n, Mintlify

## EXPERIENCE

**Software Engineer** **Jan 2025 – Oct 2026**

Nubiznez Private Limited Coimbatore, India

**Financial Multi-Tenant SaaS Platform | 2025 – Present**

**Technologies**: React, TypeScript, NestJS, Node.js, PostgreSQL, Sequelize, Jest

- Built the tenant connection infrastructure (tenant registry, connection manager, pooling, LRU eviction, Idle cleanup, graceful shutdown) supporting both schema-per-tenant and database-per-tenant deployments, plus a migration runner (public, single-tenant and all-tenant) with validation scripts.
- Implemented resumable, low-downtime database-to-schema tenant migration with PostgreSQL locking and routing cutover; audited tenant isolation and recovery, enforced fail-closed routing.
- Built an event-driven double-entry posting engine (posting rules, reversals, journal validation) and tenant-safe read-only reporting APIs: General Ledger, Trial Balance, P&L, Balance Sheet, comparative reports and direct Cash Flow method.
- Delivered the procure-to-pay flow: purchase request approvals, RFQ, PO lifecycle and GRN with QC, using row-level locking and over-receipt prevention
- Built an MCP server connecting AI to SaaS, with an OAuth 2.1 authorization server (PKCE S256), RS256/JWKS validation, a tenant-scoped RBAC tool registry, audit logging, and write tools with prepare/confirm and idempotency.
- Hardened authentication refresh-token rotation with reuse prevention and hashed storage, session management (log out all or specific sessions), OTP/MFA for sensitive-data changes, and IP/device audit logs.

- Built Jest/Supertest E2E suites with a separate test DB, factories and fixtures and wrote Mintlify documentation
- Built the Tally integration (event bus, idempotency, retry queue) and designed UI for settings, RBAC, the landing page, the PDF template editor and the Migration Center using React, Tailwind CSS and Ant Design.

**TheBusStand.com — Bus Booking & Operations Platform | Jan 2025 – Nov 2025**
**Technologies**: React.js, JavaScript, Tailwind CSS, Node.js, Express.js, PostgreSQL, Razorpay

- Developed and maintained full-stack features for a live B2C bus-booking and operations platform using React.js, Node.js and Express.js.
- Built responsive booking-workflow UIs with React.js and Tailwind CSS and integrated them with backend REST APIs for booking and operational data.
- Developed backend APIs for booking, user management and operational workflows using a modular architecture.
- Integrated Razorpay payments; implemented PDF ticket generation and automated notifications via email, WhatsApp and Firebase.
- Implemented RS256 JWT authentication and AES encryption for security workflows; built centralized logging and error handling to improve troubleshooting and maintainability.

**CRM System — TheBusStand.com | Jan 2025 – Nov 2025**
**Technologies**: React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL

- Developed CRM functionality for employee and operator management with role-based authentication and authorization.
- Implemented booking management and discount management modules, and bulk notification functionality for customers and platform users.
- Designed analytics APIs and reporting workflows for booking trends, pricing analysis and business metrics.

## CERTIFICATIONS

**MERN Stack Development Certification — KGiSL Micro College | Oct 2023 – Nov 2024**
React, Node.js, MongoDB, Express.js — 5 hands-on practice projects.

## EDUCATION

**Bachelor of Science, Computer Technology | 2017 – 2020**
Sri Krishna Adithya College of Arts and Science, Coimbatore
